

BactivateSeaweedSolution⁺

The best products for growing great results

Bactivate Seaweed Solution is a seaweed extract combined with other mineral and food sources. It contains natural bioactive substances produced without the overuse of chemicals and heat.

Bactivate Seaweed Solution is an ideal organic liquid fertilizer for agriculture, turf, floriculture and horticulture.

Bactivate Seaweed Solution contains a range of naturally occurring substances including:

- beneficial acids,
- chelating agents, and
- trace elements.

Bactivate Seaweed Solution can:

- improve flower and fruit set,
- improve photosynthesis,
- assist in biological stimulation,
- reduce stress caused by heat and frost, and
- often increase crop quality and yield.

Application Rate

Bactivate Seaweed Solution is not a generic plant food or agricultural chemical. Please contact your Bactivate distributor for a protocol for your specific needs. For more information on Bactivate Seaweed Solution and other BactiGro Australia products, visit www.bactigroaustralia.com
